

Date:

As parents, how did you find the PSII meeting?

We felt that:

We played a role in the discussions.

We could express ourselves freely even when we didn't agree with certain things.

Our opinion counted.

The support workers recognized our strengths as parents.

Our family situation, and that of our child, was understood.

The support workers clearly shared all the information with us.

We were able to participate in the decisions regarding the actions that were identified in the PSII.

Everyone wanted to work together to help our child.

We think that:

This meeting was helpful in responding to our child's needs.

The game plan is clearer for everyone.

The actions identified will help us respond to our child's needs.

We can count on a support worker who will be there for us in the future.

We'd also like to add that:

Thank you for your invaluable collaboration!
