

Taking steps ALL TOGETHER!

PSII Individualized Intersectoral Service Plan (PSII)

Who can propose to plan an PSII meeting?

You, if you're 14 or +
Your parents, with your consent

Your support worker from the education, health and social services or community network

*in collaboration with you and your family

What is it?

The PSII is a process that aims to bring together all of the partners involved around a common vision of your primary needs and to ensure that the actions and services are helpful and efficient.

Who is it for?

For children and youth who are receiving or will receive services from both the education network and the health and social services network, and who are in a situation that requires partners to come together in order to take more effective action.

What is the objective?

To have a common vision of your needs.

To make the supportive interventions you receive truly meaningful.

To work together more effectively.

To ensure that the right services are available to you at the right time.

As a young person, you have the right to:

Consent to or refuse the PSII process and the exchange of information, at any time.

Be accompanied by a person of your choice during the process.

Participate in choosing partners who will be invited to attend the PSII meeting.

Express yourself and participate in making decisions.

Ask for a review of the PSII if your situation changes, if the planned services are not received or to terminate the PSII.

Obtain a copy of the relevant documents.

** If you do not wish to use the PSII process, you can continue receiving services and assistance from your current support workers or from other support workers you may need.*

Your reflection tool

Right now,
my primary or priority need is:

Are the steps I'm taking and the services I'm receiving at the moment helpful and is everyone working **together** to meet my primary need?

Would it be helpful for everyone to meet to get a better understanding of my priority needs and the services I require?

I can talk to my support worker and discuss the possibility of using the PSII process.

Your needs are at the very **heart** of this process.

The PSII is there to better meet your needs and better support your wellbeing.
