Temporary closure of the designated evaluation clinic in Saint-Jérôme

Saint-Jérôme, September 1, 2020 – The Centre intégré de santé et de services sociaux (CISSS) des Laurentides hereby advises the public that the designated evaluation clinic in Saint-Jérôme will be temporarily closed until the morning of September 2 so that the premises can be thoroughly disinfected.

This decision was made by the establishment after four members of the clinic's staff were confirmed to have contracted COVID-19. After further investigation, employees and doctors are the only persons considered at risk and required to undergo a screening test. Measures were promptly taken to avoid any risk of transmission to patients.

The CISSS des Laurentides advises the public not to go to the clinic for walk-in testing until the morning of September 2. The establishment recommends calling the COVID-19 help line for the Laurentians at 1-888-222-5075 to book an appointment with another clinic in the region.

For addresses and opening hours of designated testing clinics, please visit the COVID-19 page of the CISSS des Laurentides website: santelaurentides.gouv.qc.ca.
