COVID-19 designated evaluation clinic in Saint-Jérôme reopens

Saint-Jérôme, September 2, 2020 – Saint-Jérôme, September 2, 2020 – The Centre intégré de santé et de services sociaux (CISSS) des Laurentides wishes to inform you that the designated testing and assessment clinic in Saint-Jérôme has reopened as of September 2 at 8 a.m.

The clinic had been temporarily closed after four members of staff tested positive for COVID-19. After further investigation, only the clinic's employees were considered at risk and were required to undergo a screening test.

As the premises have been thoroughly disinfected and the risk of COVID-19 infection reduced to the lowest, screening services at the clinic can now resume in complete safety. As a precaution, the CISSS continues to rigorously monitor the situation.

To get a screening test at the clinic you should call 1-888-222-5075 to book an appointment and reduce wait times.

The CISSS des Laurentides wishes to thank the teams mobilized for the reopening, along with the staff at our other screening clinics who provided testing during the closure.

For addresses and opening hours of our screening clinics, please visit the CISSS des Laurentides website santelaurentides.gouv.qc.ca.
